9. ☐ Other _____.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony Bonner on 6/3/2008.

The application has been amended as follows:

Claims 19, 34 and 53 have been changed as follows and claims 23, 38 and 57 have been cancelled.

19. (Currently Amended) A method for communicating one or more asynchronous transfer mode (ATM) cells from a transmitting device to a receiving device, the method comprising: receiving, at the receiving device, a first reduced ATM cell having a reduced header from the transmitting device, the reduced header including index data; identifying a first entry of a first header table using the index data, the first header table being maintained by the receiving device and having a plurality of entries storing header data; and replacing the reduced header of the first reduced ATM cell with header data stored at the first entry of the first header table to generate an unreduced ATM cell[.]; receiving, at the receiving device, a second ATM cell, the second ATM

cell having data representative of at least part of a table of one or more headers; and
updating one or more entries of header table based at least in part on the data
representative of at least part of the table of one or more headers.

34. (Currently Amended) A receiving device for receiving one or more asynchronous transfer mode (ATM) cells from a transmitting device via a network, the receiving device comprising: means for receiving a reduced ATM cell having a reduced header, the reduced header including index data; a header table having a plurality of entries for storing header data; a decompression module operably connected to the means for receiving the reduced ATM cell and having access to the header table, the decompression module adapted to: identify a first entry of the header table using the index data from the reduced header, the first entry storing header data; and replace the reduced header of the first reduced ATM cell with the header data stored by the first entry to generate an unreduced ATM cell[.]; means for receiving a second ATM cell, the second ATM cell including data representative of at least part of a table of one or more headers and wherein the decompression module is further adapted to update one or more entries of the header table based at least in part on the data representative of at least part of the table of one or more headers.

53. (Currently Amended) A computer readable medium for enabling communicating one or more asynchronous transfer mode (ATM) cells from a transmitting device to a receiving device, the computer readable medium storing a plurality of executable instructions adapted to manipulate a processor to: receive, at the receiving device, a first reduced ATM cell having a reduced header from the transmitting

device, the reduced header including index data; identify a first entry of a first header table using the index data, the first header table being maintained by the receiving device and having a plurality of entries storing header data; and replace the reduced header of the first reduced ATM cell with header data stored at the first entry of the first header table to generate an unreduced ATM cell[.]]; receive, at the receiving device, a second ATM cell, the second ATM cell having data representative of at least part of a table of one or more headers; and update one or more entries of header table based at least in part on the data representative of at least part of the table of one or more headers.

23. (Cancelled)

38. (Cancelled)

57. (Cancelled)

Reasons for Allowance

2. Claims 1-22, 24-37 and 39-56 are allowed.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hong Cho whose telephone number is 571-272-3087. The examiner can normally be reached on Mon-Fri during 7 am to 4 pm.
